

## Assortment 2024-2025

### Garden Plants

#### Did you know that:

Seed germination of ABZ strawberry F1 hybrids is 90%+

ABZ Strawberry F1 hybrids are large fruited varieties of the species *Fragaria x ananassa*. All varieties are day-neutral and propagated by seed.

Plants from seed can be propagated in a sustainable way and should be a clean start for fruit production.

Plants will bloom and bear fruit within 3-5 months from sowing.

In your garden one plant may produce 700-1000 grams of fruit during whole season.

ABZ strawberries have a sweet and delicate flavour.

ABZ strawberry seeds are to be stored cool and used within one year.

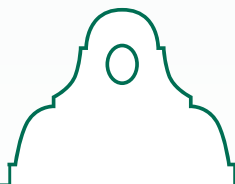

ABZ strawberry F1 hybrid varieties are protected by PVP
